Figure 1: PrEP-to-Need Ratio (2022)

PNR is a calculated measure that represents how much unmet need for PrEP exists within a geographic area. It does not explain if individual need is being met appropriately. This map visualizes the states divided into five groups of equal size based on their PNR value.

Legend

- (red) 4-8.1
- (orange) 8.1-10.5
- (black) 10.5-17.4
- (green) 17.4-25.7
- (blue) 25.7-48.1
